Location: Austin, TX

Professional Summary

Motivated Data Science student with strong skills in data analysis, machine learning, and statistical modeling. Experienced in Python, SQL, and Excel for data cleaning, querying, and visualization. Proficient in building end-to-end machine learning pipelines and deriving actionable insights from data. Seeking a data science role to apply analytical skills in real-world business problems.

Education

Master of Data Science
Lindsey Wilson University *(2024 – Present)*

Bachelor of Computer Science
University of Central Punjab *(2016 – 2020)*

Technical Skills

Programming: Python, SQL, R
Libraries & Frameworks: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn
Tools: Jupyter Notebook, PyCharm, RStudio, Git, GitHub, MySQL Workbench
Data Analysis: Excel (Pivot Tables, VLOOKUP, Data Cleaning, Basic Dashboards)
Databases: MySQL
SQL Skills: SELECT, WHERE, JOIN, GROUP BY, ORDER BY, Aggregations
Concepts: Machine Learning, Statistical Inference, Hypothesis Testing, Regression Analysis
Data Structures: Lists, Queues, Stacks, Binary Search, Sorting Algorithms

---

Projects

Customer Churn Prediction (Machine Learning Project)

- Built a classification model to predict telecom customer churn using real-world dataset
- Performed data preprocessing, feature engineering, and encoding of categorical variables
- Developed end-to-end ML pipeline using Scikit-learn (scaling, feature selection, model training)
- Applied Random Forest and Logistic Regression models
- Evaluated model using accuracy, precision, recall, and F1-score
- Github link: https://github.com/AhmedAli-DS/Telecom-customer-churn--Model-Evaluation

---

Sales Forecasting Using Machine Learning

- Developed a predictive model to forecast future sales trends based on historical data
- Conducted exploratory data analysis (EDA) to identify trends, seasonality, and patterns
- Applied regression models and evaluated performance using MAE, RMSE, and MAPE
- Visualized insights to support business decision-making and planning

---

Analyzing the Impact of Online Learning on Student Performance

- Performed statistical analysis using Python (Pandas, Matplotlib)
- Conducted hypothesis testing to compare online and traditional learning methods
- Visualized student performance trends and interpreted results

---

Work Experience

PHP Laravel Developer – AppCrates, Pakistan *(2020-2021)*

- Developed dynamic web applications using Laravel framework
- Wrote optimized SQL queries (JOINs, aggregations) for efficient data retrieval
- Built real-time order processing system improving system efficiency
- Improved backend performance by optimizing database operations

---

Additional Information

- Strong analytical and problem-solving skills
- Ability to work independently and in team environments
- Quick learner with adaptability to new tools and technologies
